EDUCATION

Texas Southern University

Bachelor of Science in Computer Science; *Expected Graduation Spring 2028*
3× Honor Roll | 1× Dean's List

Houston, TX
August 2024 – Present

Relevant Coursework

INTRO TO C++, Java, Python, JavaScript, SQL, Physics I and II, Advanced OOP with C++

PROFESSIONAL EXPERIENCE

Code Ninjas

Coding Instructor

Houston, TX
December 2024 – October 2025

- Taught foundational programming concepts through project-based lessons in JavaScript and Scratch in both one-on-one and group settings of 10+ students.
- Designed engaging coding challenges and LEGO robotics activities that strengthened students' problem-solving and analytical thinking while increasing confidence and enthusiasm for STEM learning.

TSU Summer Undergraduate Research Experience - Data Science

Research Assistant

Houston, TX
2025 & 2026

Summer 2025 (May 2025 – July 2025)

- Applied supervised machine learning models (Logistic Regression, SVM, Decision Trees, and Neural Networks) to classify high-entropy alloy phases from material composition data.
- Achieved up to 63% classification accuracy using Multi-Class Logistic Regression with the Softmax function.
- Visualized model performance using confusion matrices, bar graphs, and exploratory data analysis.
- Presented research findings through a research poster and oral presentation at the TSU SURE Symposium.

Summer 2026 (June 2026 – August 2026)

- Developed and evaluated supervised machine learning models using the Titanic dataset to predict passenger survival, applying the complete machine learning workflow from data preparation to model evaluation.
- Performed data cleaning, pre-processing, feature engineering, and exploratory data analysis to identify meaningful patterns and improve model performance.
- Interpreted model results and communicated findings through data visualizations, technical presentations, and research discussions with faculty mentors.

TSU Residential Life and Housing

Residential Assistant

Houston, TX
January 2026 – Present

- Served as a primary point of contact for residents, addressing concerns and resolving conflicts professionally.
- Enforced university policies while maintaining a safe, respectful, and inclusive residential environment.
- Assisted in planning and facilitating residential programs to increase student engagement.

Lanyard Health

Healthcare Operations & AI Intern

Houston, TX
June 2026 – August 2026

- Researched healthcare payer credentialing and provider enrollment requirements across Commercial, Medicare Advantage, and Medicaid plans to support operational workflows.
- Built and maintained a centralized knowledge base by identifying, validating, and organizing official payer manuals and provider resources across all 50 U.S. states.
- Analyzed complex payer policies and translated regulatory requirements into standardized documentation to improve operational efficiency and AI-assisted workflows.
- Performed quality assurance on provider data and internal documentation to ensure accuracy, consistency, and compliance with current payer guidelines.
- Collaborated with cross-functional teams to streamline healthcare operations through process documentation, data organization, and AI-enabled workflow optimization.

PROJECTS

High Entropy Alloy Machine Learning Research <i>Research Assistant</i>	Houston, TX <i>May 2025 – July 2025</i>
• Leveraged Python and advanced machine learning techniques to analyze complex materials data, develop predictive models that optimize alloy performance, and collaborated cross-functionally to deliver actionable insights for research advancement.	

ORGANIZATIONS

Texas Southern Tigers Data Science Club (TigersDSC) <i>Vice President</i>	<i>August 2024 – Present</i>
Texas Southern African Student Association (ASA) <i>Fundraising Chair</i>	<i>August 2024 – Present</i>
National Society of Black Engineers (NSBE) <i>Student Member</i>	<i>August 2024 – Present</i>
